

The NILOS-RING

The ideal seal for every rolling bearing.

Introducing the NILOS-RING

For compact and efficient **sealing of rolling bearings**, **NILOS-RINGS** have become a trusted name worldwide. The right NILOS-RING in the right place not only enhances performance but also reduces design costs.

Key benefits

Robust

Wear-resistant metal seal for extreme operating conditions

Flexible

Easily integrates into almost any design thanks to its compact size

Sustainable

Maximizes service life, even for premium bearings with integrated seals

Made in Germany

German engineering excellence since 1926, manufactured in Hilden

Ziller GmbH & Co. KG
Reisholzstraße 15
40721 Hilden, Germany

Designed for diverse applications

Automotive

Seals and bearings designed to reduce friction and enhance energy efficiency

Gear and drive technology

High-quality components for gearboxes, axle drives, and drive shafts with extended durability

Agricultural machinery

Robust seals and custom-engineered components for extreme operating conditions

Electrical engineering

Reliable seals for industrial automation and electric drive systems

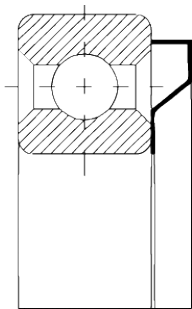

Mining

High-performance seals ensuring smooth operations and maximum reliability in mining

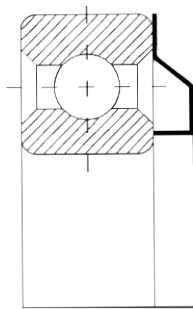

Aerospace

High-precision bearings and seals for aircraft engines and transmission systems

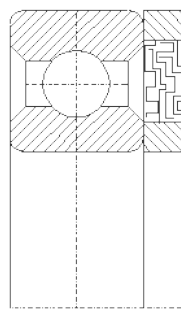

Our products: NILOS-RINGS AV, JV, ZAV, ZJV, LSTO, LST-L, AK
